

COLLOIDAL INORGANIC POLYMERS FOR IMPROVED MECHANICAL PROPERTIES IN COATINGS

WHAT IS REXTER CT?

- Our additive is a mixture of colloidal inorganic polymers that can be used as an additive to improve mechanical properties of coatings, adhesives, and resins.
- Rexter CT forms strong hydrogen bridges within the final product
- It is compatible with all water- based resins.
- Dosage rate: 5-10% over total formulation.

PRODUCT SPECIFICATIONS

Type: Anionic

Appearance: Translucid

Solid: 20 Minimum

Density: 1.10

Particle Size: 5 nm

PH: 10-11

Solubility: Fully Soluble

ENHANCING PROPERTIES
